My primary interest is in web development, both front end and back end. The industry and technology we use is constantly moving forward. It is one that requires knowledge and education throughout one individual's career. This exciting me as there will always be new things to learn and new challenges to overcome. I primary specialize for now in php with emphasis on the Laravel PHP framework. For now, I decided to transition from PHP to JavaScript.

Experience

iamante.github.io   Up to present
Web Developer/Personal Website

I design and develop my personal website to meet the company's requirements. Have a look at my online portfolio/website to know more about me and all my work, code samples and personal project.

caraevents.com   2019 - 2020
Management System

Caraevents website is a Laravel Application that focuses on the reservation, inquiries and advertising the client's product. It also has features like reservation, renting, events planning etc. I did some UI/UX design, Database Design, and Front & Back-end Development.
